Note: The percent of income assigned at each level is applied against the gross countable family income calculated in determining eligibility for each family. system divides that percent of income by fifty-two (52) weeks to assign the co-payment the family is expected to pay each week. The co-payment is assigned to the youngest child enrolled in care. DHS subtracts the assigned family co-payment from the full rate for that child when making payment to a provider. If the co-payment exceeds the rate paid for one child, the remainder of the family's share is assigned to the next oldest child enrolled. If family income or family size changes, the family co-payment is recalculated. The family is expected to make the same weekly co-payment to the designated provider regardless of the number of children or the amount of time the children are enrolled.
